Our Water. Our Future. Our Choice.

The purposes of the District include planning for and facilitating the long-term conservation, development, protection, distribution, management, and stabilization of water rights and water supplies for domestic, irrigation, power, manufacturing, municipal, recreational, and other beneficial uses, including the natural stream environment, in a cost-effective way to meet the needs of the residents and growing population of Cache County.

CACHE WATER DISTRICT BOARD OF TRUSTEES
MEETING MINUTES
March 6, 2023

The Cache Water District Board of Trustees convened for a regular meeting on March 6, 2023, at 5:30 p.m. in the Cache County Historic Courthouse Council Chambers,199 North Main Street, Logan, Utah.

MEMBERS OF THE BOARD IN ATTENDANCE:

Mark Anderson – Logan #3 Council District
Jared Clawson – At-Large Position
Jonathan Hardman – South Council District
Kirt Lindley – At-Large Position
Beth Neilson – Southeast Council District
Jeff Ostermiller - Logan #2 Council District
Max Pierce – North Council District
Bret Randall – Northeast Council District
Brett Roper – At Large Position
Jeannie Simmonds – Logan #1 Council District
Regan Wheeler – Agricultural Representative

ATTENDANCE:

Nathan Daugs, Steven Wood, Quinn Dance, Scott Clark,

CALL TO ORDER

Chairman Pierce called the meeting to order at 5:30 p.m.

The March 6, 2023 meeting agenda and the minutes from February 6, 2023, were approved.

ACTION: Motion by Mr. Clawson to approve the agenda and the minutes as submitted. Seconded by Mr. Hardman. The motion was approved unanimously (10-0).

Yea: Anderson, Clawson, Hardman, Lindley, Neilson, Ostermiller, Pierce, Randall, Roper, Wheeler

PUBLIC COMMENT

No public comments

CALENDAR EVENTS

- Mar. 8 – Northern Utah Water Conference 9:00 a.m. – 3:00 p.m. (approx. 100+ attendees)
- Mar. 8 – Bear River Watershed Council – 3:00 p.m.
- Mar. 8 – Great Salt Lake Advisory
- Mar. 10 – Ag. Water Optimization – 10:00 a.m. (link sent out)
- Mar. 14-15 – USU Runoff Conference
- Mar 20-23 – Utah Water Users
- Apr. 3 – Regular Board Meeting
- Apr. 6 – Bear Lake Advisory

5:45 Jeannie Simmonds arrived

FINANCIAL REPORT

See -Attachment 1-

Ms. Simmonds reviewed the report and explained how items are tracked. An audit will be scheduled for next month (the cost will be $5,500). She will send out an update on the grants with a breakdown of the expenditure vs. what has been reimbursed. The challenge is that reimbursements come in at varying times. Chairman Pierce asked if there is a need to adjust budgets based on the timing of reimbursements. Mr. Daugs reviewed some of the line items.

MANAGER'S REPORT

PL-566 PROJECT UPDATES

No changes since last month, still waiting for updated contracts from NRCS to move forward.

BENEFITS OF BEAR RIVER UPDATE

The contract for the study has been signed, it is anticipated to be completed by this fall.

LEGISLATIVE UPDATE

S.B. 251 Secondary Metering Requirements (Sen. Hinkins) – A few exemptions were added, including one to meet with the State Engineer to help determine where strategic meters need to be installed (rather than each home). Another $20 million was added for grant funding.

S.B.119 Per Capita Consumptive Use (Sen. McKell) – Requires reporting districts to calculate per capita consumptive use.

S.B. 118 Water Efficient Landscaping Incentives (Sen. Sandall) – Incentivizes efficient use of water including installation and maintenance of water-efficient landscaping. Cache County may not be eligible, because the bill authorizes water conservancy districts to receive grants to provide incentives, currently Cache Water District does not have the grant matching funds or means to implement this type of program. The requirement for a restrictive deed to be added was deleted. Mr. Daugs said it would be a good idea to meet with legislatures before next year to include a modification for more waterwise landscaping (e.g. drought tolerant grass). Mr.

Anderson said there are other less expensive options. The Board agreed to work on getting more information out regarding wise landscaping and less watering.

H.B. 349 Water Reuse Projects Amendments (Rep. Snyder) - Any waste treatment facility, after Nov. 1, will not be allowed to file for a reuse application for effluent water unless they have a mitigation plan to leave the same amount of water in the stream to get to the Great Salt Lake.

H.B. 299 Boating Amendments (Rep. Snyder) – Addresses financing water infrastructure related to boating. A portion of the registration fees will be put into a restricted account to help fund improvements. Hyrum Reservoir was a driving force behind this bill.

H.B. 207 Compact Commission Amendments (Rep. Snyder) - Changes the representative on the Bear River Commission from the Director of Water Resources to the State Engineer.

Mr. Daugs informed the Board of the recent hearing on water rights. The basin is being closed to any new single-family appropriations. This will not affect the cities, but any parcel in the County that has not split since 1999 can file for a water right. The County is currently performing a GIS study to determine how many parcels this may affect. Mr. Daugs is setting up a meeting with the County Council to discuss this issue and will draft a response after that meeting.

APO REPORTS

See -Attachment 2-

GREAT SALT LAKE WATER REPORT

See -Attachment 3-

OTHER

Mr. Ostermiller asked if the Water District has any assignment or purview over flooding issues and/or coordination. Mr. Daugs said most cities have been working with their emergency management departments on possible solutions if this happens, this is not part of the scope of the District.

ADJOURN

The meeting adjourned at 7:30 p.m.

Next Meeting: April 3, 2023

APO SUBCOMMITTEE MEETINGS – 2/20/23

5:30 Local Outreach

N Daugs, M. Pierce, J. Clawson, J. Simmonds, B. Neilson, M. Anderson

- Summer localscapes classes in May. Mr. Daugs has reached out to Jordan Valley to help with those.
- If the turf buyback bill passes the legislature the information will be passed along to the City Mayors/City Councils. Every City will have to adopt new ordinances. Mr. Daugs will get information to Mr. Pierce to be put on the City Manager's meeting agenda in March.
- Mr. Daugs said the Water Resources Board will be doing a tour of projects in August and questioned whether the District should also do a tour in May (as was done last year). Mr. Pierce said the May tour was well-attended; Mr. Daugs will look into some possible projects. Ms. Neilson asked about creating an email list for these types of announcements to provide broader communication to those who might be interested (possibly gathering information on attendees of the conference). Ms. Simmonds said there is also a way to get alerts from a link on the new website.
- Casey Snyder will be reviewing some of the new legislative bills at the Northern Utah Water Conference.
- USU students will present projects in May.
- A few members will be attending the Logan Wilson Neighborhood meeting to discuss PL-566 projects.
- Not doing the Home Show in March; can do radio spots to help get information out.
- When completed, the Annual Report will be a good outreach tool.
- Ms. Simmonds was asked to put together a 3-year summary in all financial categories (excluding PL-566) for March 6 Board Meeting agenda.

6:00 Conservation

N Daugs, M. Pierce, J. Clawson, J. Simmonds, B. Neilson, M. Anderson

- Historically when restrictions are put on, consumption usually rises.
- It is important to convince people that conservation is an important issue.
- Briefly discussed the idea of changing the water structure taxing rate. Mr. Daugs said the bill will likely pass but will require a 2-year study to show the true cost of water and how taxes are being collected and what projects the funds are being used on.
- Mr. Daugs will check on last year's end report for water checks.
- Secondary metering could be a tool for conservation if the program is implemented correctly. It will take time to create a good valley-wide system.
- There are different ways to achieve waterwise landscaping with turf and plants that require less water, which could be a good solution. Another good solution is educating people about watering less (without making major landscape changes).

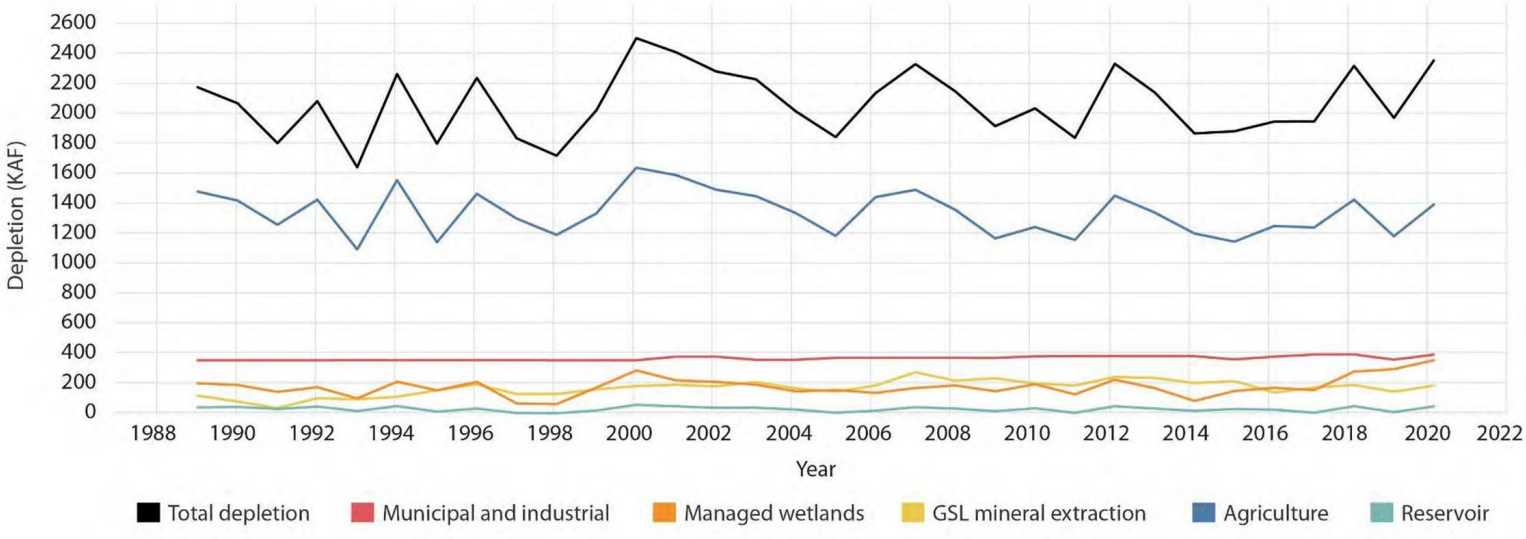
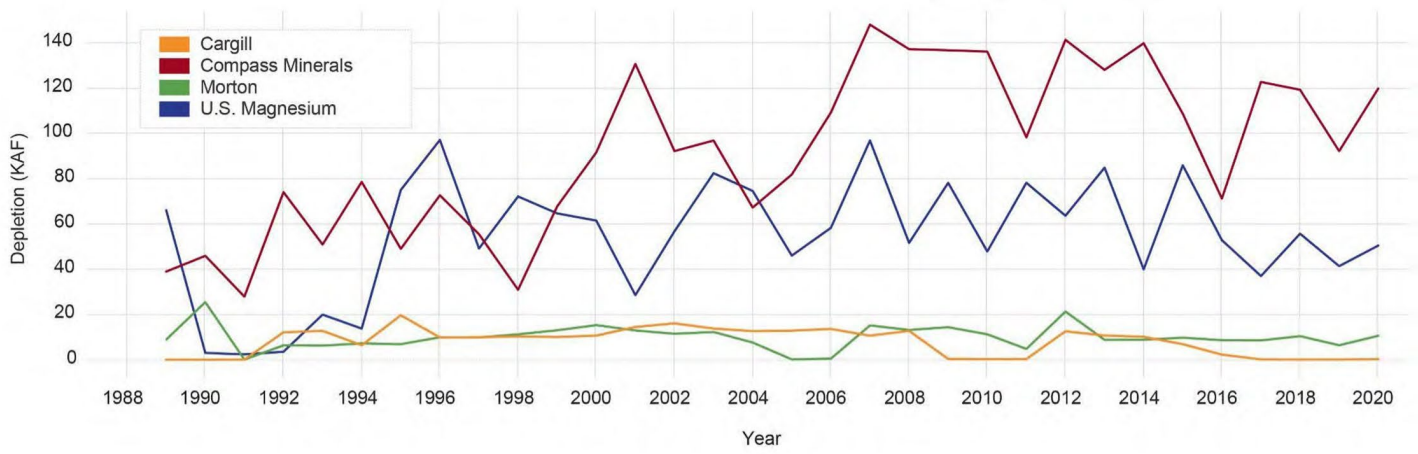
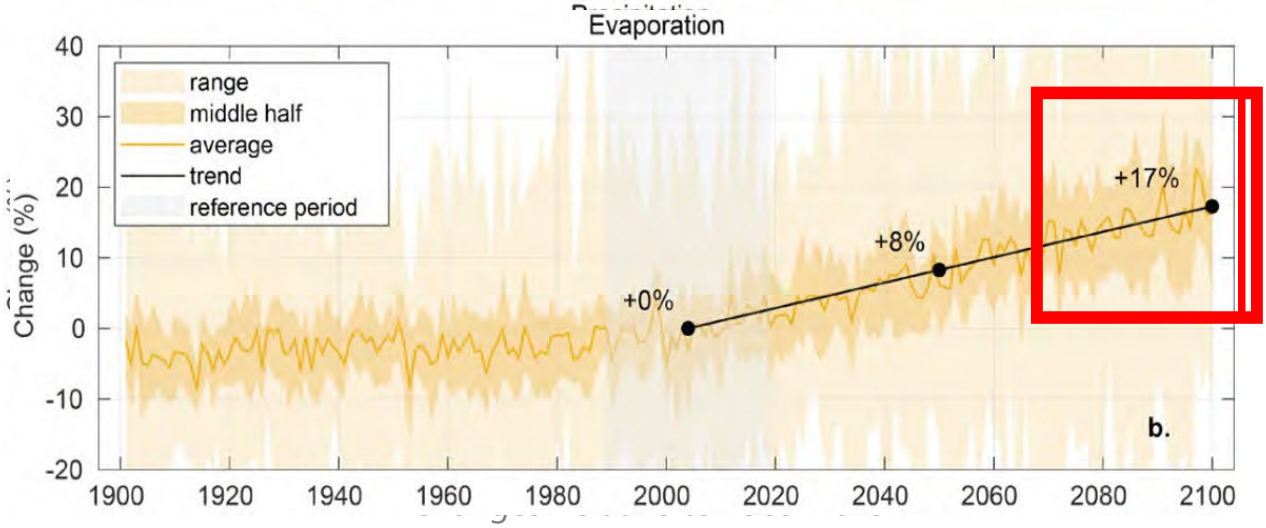
Human Water Depletion by Type, 1989–2018

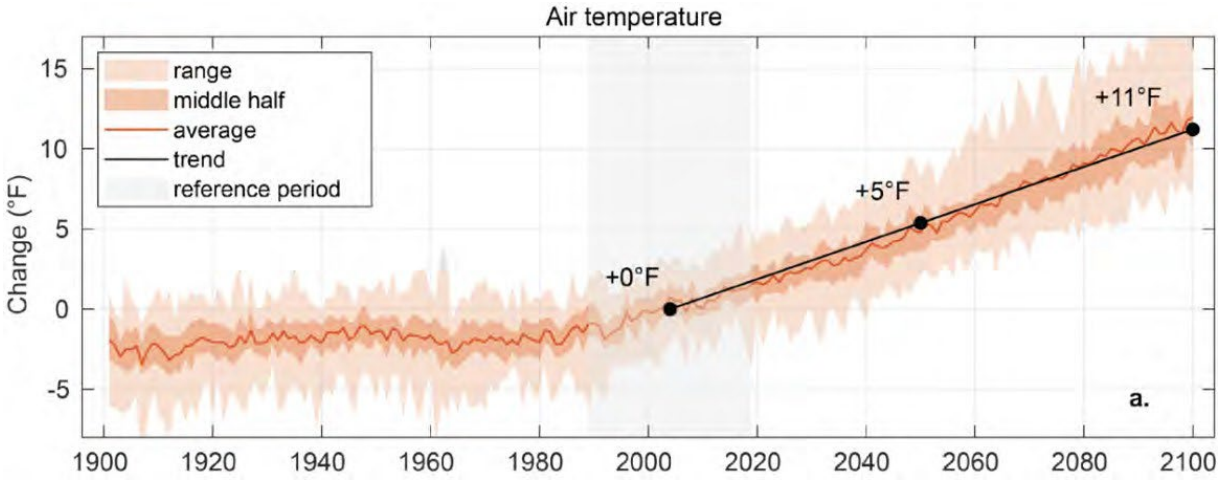


Mineral Extraction Water Depletions on Great Salt Lake, 1989–2018



Projected Trends in the Great Salt Lake Basin, 2022-2100





Projections indicate that slight increases in precipitation (on average) will be more than offset by increases in temperature and evaporation, **creating a further challenge for the lake .**

Note: The analysis is based on a high greenhouse gas emission scenario referred to as Shared Socioeconomic Pathway (SSP) 585, 30 global climate models from the Coupled Model Intercomparison Project Phase 6 (CMIP6).

Average Annual Elevation of the Great Salt Lake with Elevation Zones, 1903-2022

Policy Options

Conservation

- Commit conserved water to Great Salt Lake
- Optimize use of agricultural water
- Optimize municipal and industrial water pricing
- Limit municipal and industrial water use growth
- Utilize water banking and leasing
- Conduct active forest management in Great Salt Lake headwaters
- Optimize Great Salt Lake mineral extraction

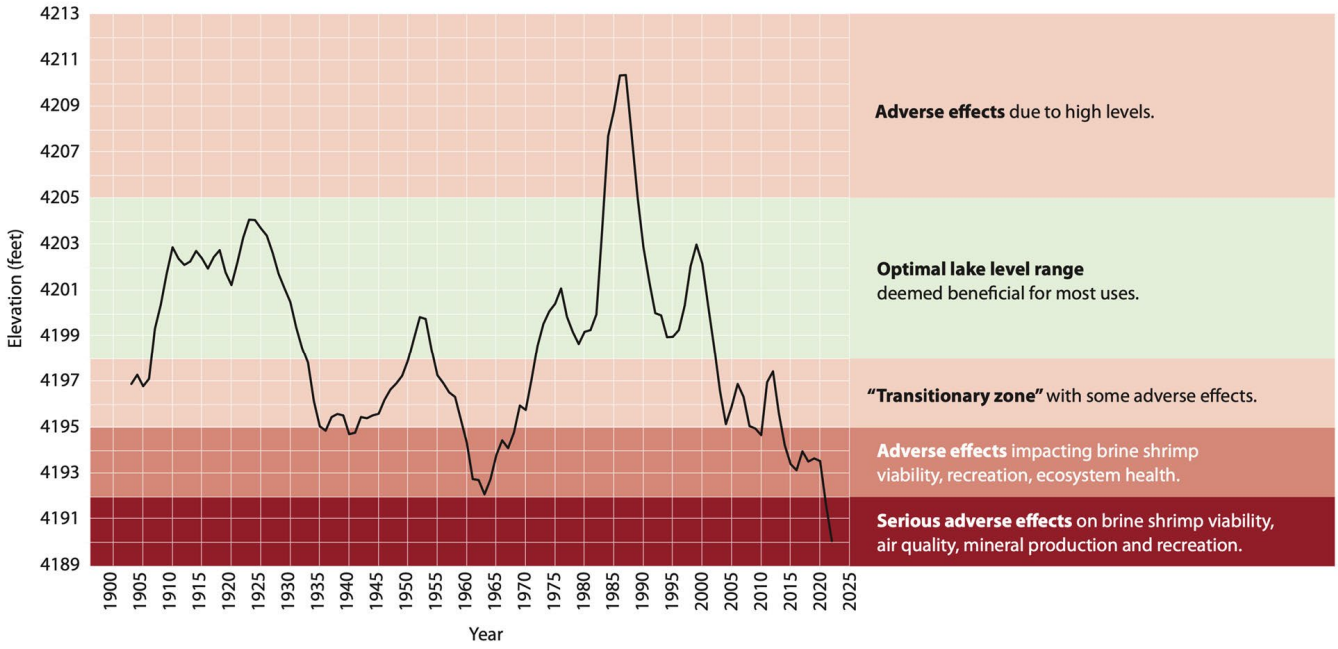
New Water

- Import water
- Increase winter precipitation with cloud seeding

Engineering Solutions

- Raise the causeway berm
- Mitigate dust transmission hotspots

Average Annual Elevation of Great Salt Lake with Elevation Zones,1903-2022



Sources: US Geological Survey Historical Elevation at Saltair Boat Harbor; Utah Division of Forestry, Fire and State Lands, GSL Lake Elevation Matrix, 2013

Range of Conservation Needed (KAF/year)

Target Elevation (ft.)	Fill in 5 years	Fill in 10 years	Fill in 20 years	Maintain
4,189 ft.	-	-	-	0-268
4,192 ft.	116-700	0-524	0-442	0-404
4,195 ft.	629-1,213	270-854	127-711	95-679
4,198 ft.	1,332-1,916	760-1344	541-1,125	494-1,078

Scenarios for addressing Great Salt Lake Water Levels

Sector	Average Depletion, 1989-2020	Scenario 1		Scenario 2		Scenario 3		Scenario 4	
		Equal percentage reductions to prevent further decline		Equal percentage reductions		Primary reliance on municipal and industrial conservation to achieve desirable lake level in 20 years		Primary reliance on agricultural conservation to achieve desirable lake level in 20 years	
		Percent	Volume (KAF/year)	Percent	Volume (KAF/year)	Percent	Volume (KAF/year)	Percent	Volume (KAF/year)
Agriculture	1,188	17.5%	208	35%	416	20%	238	42%	499
Municipal and Industrial	358	17.5%	63	35%	125	69%	247	20%	72
GSL Mineral Extraction	165	17.5%	29	35%	58	69%	114	20%	33
Total	1,711		300		599		599		604

Note: Average depletion values in this table exclude the West Desert, as conservation in the West Desert is not deemed to be a viable option for getting water to the lake.
Source: Analysis by Great Salt Lake Strike Team, 2023

Key Findings

How did we get here?

i. Despite some dry years, no long-term trend in precipitation.

ii. Human and natural consumptive water use are the main drivers of low lake levels. Other smaller contributing factors include natural precipitation variability and climate warming.

iii. Plan for similar or less water available in the GSL basin in coming decades.

What can we do?

i. Scenarios to different lake elevation range goals.

ii. Policy assessments: Conservation, new water, engineering solutions.

iii. Committing conserved water to the lake is key.

Average Natural Flow by Basin, 1989-2018
